FOR CONSUMERS AND SERVICE PROVIDERS

Ke2 helps protect you from scammers.

One touch, and you know the service is genuine, and it knows you're there and authorised to use it.

What Ke2 will do

Ke2 will give you a trusted connection to your chosen services. A fingerprint touch on your **Ke2-ID** card confirms you are the authorised person and you are here, **whilst checking that the service is genuine**. This helps protect you from fake websites and impersonators before you share information or approve a transaction.

Ke2-ID card concept

HOW YOU WILL USE KE2

1 Activate your card

Touch the sensor with your card at a compatible phone or reader.

2 Make the connection

Ke2 verifies you and the service you are connecting to.

3 Use your service

Access your account, use your ticket or approve an action.

For consumers

Know who you are dealing with

Check a service is genuine before you sign in, buy a ticket or approve a transaction.

Use one card across services

Connect your Ke2-ID to the supported services you choose and use it whenever you return.

Protect your privacy

Your fingerprint will not be stored. Your personal details stay off the card.

For service providers

Welcome the right person

Confirm the authorised person is present before granting access to an account, ticket or service.

Protect customers and revenue

Help prevent impersonation, unauthorised sharing and misuse of paid access.

Spend less time on passwords

As Ke2 replaces passwords, help reduce resets, access problems and related support queries.
